
Proposal Process Flow

JPG's Proposal Process Flow can be defined by 8 distinct steps (see diagram below). This process usually applies to the following situations: 1) where companies who have on-going project needs wish to partner with a service company such as JPG to support their publications effort on a continuing project basis (primarily on an off-site), and 2) where companies who have documentation issues internal that need to be resolved wish to partner with a company such as JPG to resolve their publication issues with either on-site or off-site support strategies (or a combination thereof). Note: See our Quotation Process Flow diagram for our process in initiating individual project quotations.
